

LOOKING FOR A *drug-free* SOLUTION?

Brain Time™ is Introducing Interactive Metronome® to New Zealand

Interactive Metronome® (IM) has been available in the USA for over 15 years. IM is a therapy training program that evokes neuro-plastic changes in the brain. The IM specialized patented equipment plugs into your computer. Published research has shown IM helped markedly with:

- Academic & behavioural improvement
- ADHD
- Attention & Motor Coordination
- Auditory Processing Disorder
- Brain Injury/Concussion
- Cerebral Palsy
- Physical Coordination
- PTSD & Head Injury
-(dual diagnosis)
- Reading Problems
- Sport Performance –e.g. golf
- Stroke Recovery

Each trainee has their own program based on their own pre-assessment data. Training takes place 3-5 days a week. There is a weekly appointment by phone or Skype with your professionally qualified IM Provider. You train at home. No travel or parking hassles! Your Provider has instant access to your ongoing training results, and continually adjusts your program for maximum gain. The three standard programs run for 5, or 8, or 12 weeks (15-40 hours). Exceptional situations may involve extended training. For the vast majority the gains are permanent, Some conditions may require the engagement of an Occupational Therapist, or other appropriate professional. Brain Time Ltd offers a conditional refund guarantee.
